

Glass bottle and jar collection service (2012/13)

In 2010, the Council launched a new trade recycling collection service for clean glass bottles and jars. Unfortunately we are unable to collect sheet glass, mirrors, cookware such as pyrex or fluorescent tubes or light bulbs as part of this service.

Glass is collected from a 360 litre wheeled bin costing £1.39 per week to hire and £4.63 per collection.

For health and safety reasons, a larger bin cannot be provided but if you generate large amounts of glass, additional bins can be provided. Glass **must** be collected from the wheeled bin provided and cannot be collected from sacks or any other type of container.
